Mr. Oli er S. Kelly and Chas. W. Constan line, committee of the jail hill protestants to bear the protest to Washington and present the matter to the government officials there returned here last evening from performance of that mission and report that they accomplished every object they had in view in go ing to Washington to their full and entire satisfaction. They were provided not only with the formal protest, signed by thousands of our tax-payers and citizens generally, but with large charts and maps of the city, showing the several siles proposed for the new government building, and their relative situation a regards the business districts and most thickly inhabited portions of the place. The committee was well received at the treasury de partment and their business referred to the government supervising architect, who examned their papers and listened attentively to statements made. The substantial and practical result of these interviews was that the government authorities agreed to send an expert special commissioner to this city some time within the next two weeks. He will personally inspect the sites proposed and hear arguments and vidence in favor or against them, ail bill included, after that making his ecommendation to the government, which will probably be accepted as final. This is all the committee from here asked or desired and they return jubilant over their success, which is also cause of no small gratification to the large mass of protesters. The Springfield gentlemen called the attention of the authorties to the West and adjoining property, southwest corner Market and High streets but it was stated to them that not above \$20,00 of the \$1.0,000 appropriated could or would be devoted to the purchase of the lot. A \$65,000 is asked for the required ground at that point the balance over \$20,000 is rather more than can be raised by private subscription, and as the government does not

Summer German at the Springs Las

The Yellow Springs house was again th scene of much festivity last night, the occasion being a very brilliant German, gotten up by boarders at the house and led by Mr. Bert Allison, of Xenia. The following people from this city attended: Mr. and Mrs. John Carey, Mr. and Mrs. Harry Burleigh, Miss Ellen Wilson, Miss Alice Foley; Mesers. Will Rodgers, Frank Johnson, Ed Hurd, Ber Buxton, Will Kidder and Jim Todd. The rest of the party, twenty-four couples in all, were from Xenia, Dayton and Cincinnati. The dancing was begun with the plain flower waltz at 10 o'clock and six figures were danced before the intermission at 12. After a very pretty little supper the dancing was again begun and six more figures were anced. Some of the figures were very original and pretty, and the favors were all that could be expected at a summer german, some made by the fair hands of the ladies participating being very exquisite. All those who attended are very enthusiastic over the success of the affair.

The following party from Harmony township are now at Magnetic Springs: Uncle Billy Beard, Uncle Jesse Boyd, Isaac Boyd, John Donnel, Milton Goodfellow, William Stickney, Mrs. Bishop Sprague, and Mrs Phube Goodfellow. To Physicians.

## A BIG BURGLARY.

Over \$300 Worth of Clothing Stolen from a Tailor Shop.

Quite an extensive burglary was committed during last night at the tailoring establishment of H. Willenborg, on West High street, just a few doors west of Market. When Mr. Will-nborg opened his shop this morning he discovered that the window in the rear of the room was opened and all the made-up goods on his rack were gone. The job had evidently been deliberately planned and executed by a gang of men who came provided with a wagon to remove the goods. Before closing the store at 8 o'clock last evening the shutters of the rear window had been closed, the window let down and a stick placed as a brace between the lower sash and the top. However, a space of a few inches had been left open at the top of the window. The burglars had pried off a couple of slats from the shutter and unfastened it; had climbed upon a store-box at the window reached in, removed the brace and opened the sash at the bottom. The multiplicity of tracks in the back yard showed plainly that at least three or four men had assisted in the operation. They had driven their wagon in the alley in the rear and climbed the back fence to get to the window. Once in the goods had been handed out of the window to parties on the ou side who had carried them to the wagon. Mr. Willenborg thinks his total less will aggregate over \$300, August 8 h, at 10 a, m. A good house, lot and four almost new bolts of cloth not ye made up. Willeaborg complained to the po-lice at once and Officers Norton and Mast went down to look over the ground. The officers have no definite clue as yet to the perpetrators.

## WAN AND TALK.

What the Prospect for Finding Natural

Gas Is. The natural gas men are all agog again and it looks as though something were going to move very shortly. The experimenters C. C. Funk, Dan Minahan, W. H. Pretzman, and Albert McIntire will open bids tomorrow for sinking a well 1,000 feet deep. George H. Frey is organizing a company with P. P. Mast, John Foos and others to start a well on his property about 2,000 feet above the original find. The arrangements are by no means complete as yet but the probability is that all the parties interested will "chip in" to pay for the boring of the first wellwhich will be put in either on the original claim or on Frey's property. Those interested in the matter are becoming more convinced every day that they have struck it reh. Funk and Minahan have had experimenters digging all week to try to strike the vein and find the most appropriate location for the well. The testing of the gas by Prof. Smith is still in process. So far he has found 85 per cent. of pure marsh gas, the substance which forms the bulk of the gas in the Pittsburg wells. The other 15 per cent. are foreign substances, and they are now testing for entholine, which turnishes the illuminating qualities. Those who have studied the matter agree on the theory hat the position of the rocks at that point was caused by an eruption and not by the wear of water. If such is the case, there is no certainty where they will strike rock in the boring.

The I. B. & W. freight conductor, Crozser, killed near Bellefontaine yesterday, as stated in last evening's GLOBE REPUBLIC, was buried this atternoon from the residence, southwest corner of North and Fisher streets. Much sympathy is expressed for the widowed wife and mother. Deceased was an Odd Fellow, but his membership had lapsed, it is said, and his life insurance in the railroad mutual association had run out. Some of the friends called upon Coroner Coleman today, inquiring as to an inquest, in the belief that the facts of the kill ing would, if brought out, show grounds upon which a suit for damages against the railroad company might be based. Mr. Coleman referred them to the cornner of Logan county, the accident having occurred in that county, and being, therefore, out of his juisdiction. The remains could not be seen and the casket was not opened at the fu-
